GROTTO Industry Briefing
HOK Sustainable Building Design

BRIEFING SERIES / Washington, DC

HOK sustainability, science and technology team leaders highlight Platinum and Gold star LEED projects in Saudi Arabia, Haiti and Washington, DC to representatives from the Embassies of; Bahrain, Oman, Poland, Saudi Arabia, Sweden The United Arab Emirates, and delegates from the US Polish Chamber of Commerce of Florida and the Americas, Egypt, Maryland and Virginia. The sustainable buildings briefing, office tour, and luncheon at the firm's Georgetown location initiate GROTTO's 2012 technology transfer series, as the organization prepares for the "First Look Film" with NASA and The Library of Congress to debut at the UN Rio+20 Conference.

HOK's team leaders escorted members of the delegation on a tour of the firm's offices. Delegates viewed exhibits of the firm's numerous building designs and awards of achievement as HOK has "written the guide book on sustainable design." An explanation of how the firm "walks the walk" with greening of its offices to accommodate staff and the sustainable elements incorporated in the building's retrofit. The tour highlighted working models and sustainable material samples utilized in HOK's various building designs around the world. GROTTO delegates enjoyed a unique insight into the world of sustainable building, our thanks to HOK.

Lockheed Martin GROTTO Briefing
and Global Vision Center Tour

BRIEFING SERIES / Washington, DC

Lockheed Martin – Energy Portfolio

Prepared for: GROTTO Visit 2.25.11

Andy Solem, VP New Business
Corporate Engineering & Technology
25 February 2011

Lockheed Martin's (LM) Vice President of Business Development hosts GROTTO delegates to present LM's global partnerships and innovation sustainability solutions at LM Global Vision Center in Crystal City, Virginia on February 25th, 2011. Internationally revered for its historic leadership in aerospace engineering, the company is taking on climate change effects through its next generation of alternative energy solutions department. Senior trade, science, defense, and commercial representatives from the Embassies of: Belgium, Columbia, Denmark, Germany, Morocco, Norway, Saudi Arabia, US Commercial Service and the World Bank, along with trade executives from Italy, France and the USA spent half a day exploring innovation collaborations. The briefing is part of GROTTO's sustainable development programming.
